

# Creating Community Wellness Society Backgrounder

## Our Purpose

Creating Community Wellness Society, *The Health Charity*, exists to support the charitable (no cost to the person receiving the services) work of the Victoria Health Co-operative and other organizations that provide wellness education, and wellness, health and medical care services to the public.

We are particularly interested in work that focuses on wellness education, individual self-management of their own health, community-based health, the integrative approach to wellness and health care, and outreach to vulnerable individuals and groups.
